

A Full-Featured V-Plow for Your UTV

The VUT68 comes standard with a 2HP DC-powered hydraulic unit comes equipped with SAE standard cartridge valves and hefty 3/8 inch rubber hoses. The plow uses two double-acting angle cylinders for backdragging with no hassle. The 1 ½ in. cylinders allow the plow to operate in V, straight, or scoop modes. A heavy duty lift cylinder, chain, and lift arm offer 35° of travel for powerful snow stacking. Two independently actuated 6 in. trip edges help protect the plow from hidden obstacles and divots that are common when plowing paths, sidewalks, and lots. Plus, the VUT Series can be on and off your truck quickly with the dual foot pedal quick mount. Just align your truck, actuate the pedals, and attach lock pins and electrical plugs.

VUT plows come standard with a steel cutting edge, wire reinforced blade guides, and gloves-on in-cab controller. Buyers Products sets a new bar for what you should expect from your plow company.

Product Common Use: UTVS, PATHS, and SIDEWALKS, SMALL PARKING LOTS, WALKWAYS.

PRODUCT SPECIFICATIONS:

Plow Type: V-Plow
